## **DETAILED ACTION**

### ***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3, 8-12 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Shimoda (USP 5,216,351). See figure 1 and column 2, lines 1-6. Shimoda discloses a voltage regulator (10), a switching regulator (11) integrated on a single substrate (see column 2, lines 1-6), with external supply voltage (1), an internal connection (Vsw) in the circuit for feeding the supply voltage from the voltage regulating circuit (10) to the switching circuit (11).

### ***Allowable Subject Matter***

4. Claims 4-7 are allowed. None of the cited prior art discloses a switching circuit that is electrically isolated from the voltage regulating circuit that is on the same substrate or integrated circuit.

***Response to Arguments***

5. Applicant's arguments filed 1-12-04 have been fully considered but they are not persuasive. It is clear to one of ordinary skill in the art that even simple resistor within a circuit constitutes regulation therefore a regulator be it a voltage or switching regulates the voltage. Please carefully review the above rejection and the cited prior art.

6. Applicant's arguments fail to comply with 37 CFR 1.111(b) because they amount to a **general allegation** that the claims define a patentable invention without specifically pointing out how the **language of the claims patentably distinguishes** them from the references.

7. Applicant's arguments do not comply with 37 CFR 1.111(c) because they do not clearly point out the **patentable novelty** which he or she thinks the claims present in view of the state of the art disclosed by the references cited or the objections made. Further, they do not show how the amendments avoid such references or objections.

***Conclusion***

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
